

EZDraw 41T

Wire Drawing Lubricant

Description

EZDraw 41T is a calcium stearate based lubricant that contains extreme pressure (E.P.) additives, organic viscosity improvers and other lubricity agents. This combination of ingredients provides exceptional lubricating properties and leaves a homogeneous residual on the drawn wire.

Applications

EZDraw 41T can be used in a variety of applications, some of which include:

- Mechanically descaled high carbon breakdown
- Mechanically descaled low carbon wire for fence and welded mesh
- Precoated high carbon wire
- Precoated low carbon wire
- Stainless steel rod breakdown

Operating Parameters

- Up to 12 holes
- A wide variety of rod breakdown and finished wire sizes
- Speeds compatible with the newest machine capabilities and technologies

Properties

Properties	
Appearance	Gray free-flowing, powder
Solubility	Water insoluble
% Moisture	1.0 - 2.0 (typical)
Assay	Insoluble stearates, sulfur, and other additives
Softening Point °C	>120

Packaging

EZDraw 41T is available in 300 lbs fiber drums or 1500 lbs supersacks
